SPARFORM AQUADRAW LU 260

AQUADRAW is a highly active blend of synthetic and natural lubricity additives in a stable viscous emulsion providing the ideal medium for high speeds and deep draws. The versatile AQUADRAW allows for additions of water to give the ideal product and viscosity to suite individual applications. The main advantages of an emulsion formulation is flexibility, required in mixed press shops, as well as being very easily removed with either high pressure water rinse or mild alkaline degreasers. Used in the manufacture of kitchenware, tube, pipes, automotive components, ordnance cases, white goods and closures.

- **Ideal for medium to heavy duty applications**
- **Water extendable**
- **Chlorine sulphur and phosphorous free.**
- **Cleaner working environment**
- **Can be used at high speeds**
- **Easily of removed**
- **Multi-metal compatible**

Application

By roller, swab, spray or flooding either during blanking or at the head of line immediately before pressing operations depending on dilution.

If required can be diluted with water by up to 10 parts dependant on application and performance required. Always add concentrate to water and mix well before use.

Available in 5, 25 and 205 litre plastic containers
Always add concentrate to water
