B.F.T.T.100 BI 307

A concentrated effective biocide and fungicide with 100% kill. Designed for recirculating water based systems such as machine coolants, coolant concentrates, technical emulsions. May also be used in fuel oil tanks under controlled conditions. Rapidly destroys micro-organisms and provides long term protection against further infection. Extremely versatile and economic in use.

Effective at high dilution

Universal application

Long Lasting

Low toxicity

Nitrite free

Good material compatibility

- **Supports anti-corrosive properties**
- **Boosts pH levels**

Application Re-circulatory Systems

Add directly to recirculating system at maximum of 0.15%. Allow at least 10 days between additions to avoid overdosing system.

It is advisable to inform your coolant supplier of additions made.

Fuel Oils

Treat at up to 0.3% for a total bacterial kill. Re-treat periodically at 0.10% to control re-infection. Best results are obtained if the biocide can be added prior to bunkering. This effectively treats the water layer where bacteria breed.

Store in sealed containers between 5°C and 30°C.
