## DENATURE

HA 520

**Denature** is a caustic based low foam liquid denaturant, developed for use in water curtain paint booths and scrubber units. The product is designed to denature paint over spray, preventing accumulated paint solidifying thus making booth maintenance easier. It will due to its alkaline nature prevent bacterial growth.

**Denature** is suitable for use on ferrous metals and most plastic surfaces. Aluminium and zinc however may be corroded.

### DIRECTIONS FOR USE

Use concentrations are dependant on the type of paint and the design of the booth or scrubber unit, but typical concentrations are between 1.0% and 2.0%

### CHARACTERISTICS

Appearance	Cloudy liquid
Odour.	Odourless
Solubility	Water soluble
Corrosive action	Safe for use on ferrous metals but corrosive to `aluminium, zinc, and their alloys.
pH of working solution	12.5
Flammability	Non Flammable

### **HEALTH AND SAFETY INFORMATION**

#### **Safety Advice**

Corrosive contains Sodium Hydroxide in solution (35%), Substance identification No 1824 Causes severe burns. Wear suitable protective clothing Keep out of reach of children.Do not mix with other chemical products unless specifically directed.

**First Aid** Wash splashes from the skin immediately with soap and water. If swallowed, **DO NOT INDUCE VOMITING.** give water to drink. Medical attention is recommended following eye contact, or if the product is swallowed.

**Spillage's** Sweep up for re use or disposal as waste. Spillage's of solution should be contained and absorbed with an inert mineral product.
