Rinse Aid NU 319

Originally developed in Scandinavia for vehicle rinsing and water removal, this unique combination of surface-active agents creates a 'just waxed' look on paintwork and trim. But does not actually leave any wax residue. Reduces streaking and spotting on glass and is very effective at high dilutions. Will prevent seawater drying to salt spots in large quantities. Excellent as an anti-static fluid.

- Non-hazardous formula
- Safe on paintwork and metal
- Does not contain ingredients which accelerate metal corrosion
- Can be used on marine glass
- Ideal for hot or cold pressure wash machines
- Effective in hard and soft waters
- Works well in automated brush-wash systems
- Biodegradable

Application

Car / Lorry Cleaning: After washing use at up to 1 to 200 parts water via dilution system when rinsing with clean water.

Automatic Brush Washing: Apply via machine dilution system at up to 200:1.

Anti – Static Fluid: Dilute with water to 1 – 3% concentration, spray liberally over area, which requires treating. Avoid electrical equipment and sensitive fabrics/furniture. Re-apply at regular intervals.

Marine: Apply by brush, cloth or spray to glass or plastic when diluted to 100:1 with fresh water. Allow drying.

HEALTH AND SAFETY INFORMATION

Safety Advice Not classified as dangerous, however the following safe working practices are recommended. Keep out of reach of children.

First Aid Following eye contact flush thoroughly with water. If swallowed, **DO NOT INDUCE VOMITING.** give water to drink. seek medical attention.
