RUSTGUARD VCI RP 804

UNIVERSAL VAPOUR CORROSION INHIBITOR

A solvent deposited, non flammable dewatering and vapour corrosion inhibitor giving an ultra light gelled oil film. Provides medium term protection, even in corrosive atmospheres on ferrous and aluminium alloy components using much lighter film weights than conventional temporary coatings. The specially selected VCI components provide enhanced protection in difficult to reach areas of machinery internals and storage tanks. A multi application product ideal for use as an inter process coating or as the single protective during transit and storage.

- **Good de-watering properties**
- **Oil film - no need to clean before assembly**
- **Contains finger print suppressant**
- **Good coverage per litre**
- **Can be removed easily if required**
- **Contains effective VCI**
- **Universal Application**

Application

Dip tank: Using a wire basket submerge components for 30 seconds minimum. Lift from fluid allow to drain and stack to dry. Drain tank of excess water periodically.

Brush or spray: Liberally apply to components or surface and allow to dry.

Storage: For enclosed systems add 5 litres per cubic metre space.

Covering capacity when dipped or sprayed: 78 sq.metres/litre.

Protection:

Covered Outdoors
