SPARTAN SUPERCUT LU 221

A multi-functional semi-synthetic metal process fluid which produces a translucent micro emulsion when diluted in water to give excellent visibility for the machine operator. It incorporates the latest non-staining performance additives to ensure complete multi-metal compatibility.

Based upon synthetic and natural esters in order to provide excellent machining performance across a wide range of applications. Low foaming tendency allows for use in the most arduous modern day machining centres at a higher concentration level.

- Based Upon Renewable Technology
- Excellent Medium Severity Performance Characteristics
- Chlorine Free
- Secondary Amine Free
- Triazine Free
- NP Ethoxylates Free
- Multi-Functional
- Low Foaming Tendency
- Multi-Metal Compatible
- Good levels of Boundary Lubrication

Application Rates:-

Grinding	2 – 4 %
General Machining	4 – 6 %
Milling & Threading	5 – 6 %

Always add concentrate to water

Automated dispensing equipment is available together with refractometers for asuring concentration in use. Tramp oil skimmers and dip slides to order
