WATER SOFTENING POLYMER NU 321

A highly effective treatment for cleaning systems that suffers from hard water salt deposits. This product complexes the calcium ions in solution reducing the effect when heated and dried.

Regular treatment will prevent scale build up.

- **Instant Action**
- **Easily complexes hard water salts**
- **Safe on most metals**
- **Effective in hard and softer waters**
- **Contains powerful additive**
- **Does not contain acid**

Application

To the recirculating system add 1% of polymer or pre treat the cleaning fluid to be used. More may need to be added if water very hard.

HEALTH AND SAFETY INFORMATION

Safety Advice Not classified as dangerous, however the following safe working practices are recommended. Keep out of reach of children.

First Aid Following eye contact flush thoroughly with water. If swallowed, **DO NOT INDUCE VOMITING.** Give water to drink. Seek medical attention.
